Cara Oberfoell

UX/UI Designer

coberfoell@gmail.com | Los Angeles, CA | www.linkedin.com/in/coberfoell

I specialize in designing enterprise software to bring clarity to complexity. With 15 years of experience across interface design and complex systems, I translate technical requirements and intricate workflows into clear, practical interfaces that let people focus on their work rather than the software.

UI/UX DESIGNER — Freelance

October 2026 - PRESENT

Collaborate with developers, subject-matter experts, and product teams to deliver practical design solutions that balance user needs with technical and operational constraints.

UI/UX DESIGNER — Zoic Labs, Culver City, CA

March 2020 - October 2026

Analyzed complex requirements and workflows to identify gaps, clarify interactions, and develop design solutions for defense and government software.

Collaborated with developers and subject-matter experts to translate technical concepts and operational processes into clear, implementable interfaces.

Developed and presented alternative interaction models, explaining design tradeoffs and balancing workflow complexity, usability, and engineering feasibility.

Created reusable Figma components, variants, and states to support consistent interface design and design-system development.

Partnered with developers throughout handoff and implementation to clarify design intent, resolve technical constraints, and adapt designs to engineering realities.

Shared design leadership across projects in a small team, leading design efforts on some projects while supporting a fellow designer on others.

Step Into Biology | Educational Interactive Experience

- Designed a consistent visual interface across the educational application, including its administrative component, translating the established UX flow into cohesive screens and interactions.
- Designed navigation, interactive elements, and interface patterns while adapting visual concepts to technical requirements and implementation constraints.

- Collaborated with UX designers, developers, and a multidisciplinary team to deliver the finished experience.

LEAD PRODUCTION ARTIST — Inhance Digital, Los Angeles, CA

November 2013 - March 2020

Led production artists in creating visual assets for interactive applications, interfaces, motion graphics, and animations across Unity, Unreal, iOS, web, and proprietary real-time 3D platforms.

Mentored two junior production artists and supported the team in resolving production pipeline questions and maintaining technical and visual standards.

Collaborated with developers to adapt visual designs to technical constraints while preserving the intended experience.

PRODUCTION ARTIST — Inhance Digital, Los Angeles

October 2011 - November 2013

Designed interface elements for interactive kiosk and iPad applications based on established wireframes and visual direction.

Coordinated asset delivery between artists and programmers to support accurate implementation.
